SUPPLEMENTARY INFORMATION:

Description of Information Collection

Title: Measurement Service (MS) Records.

OMB Control Number: 0560-0260.

Expiration Date: 12/31/2015.

Type of Request: Extension.

Abstract: When a producer requests a measurement of acreage or production from FSA, the producer uses the form FSA-409 (Measurement Service (MS) Record) to make the request, which requires a measurement fee to be paid to FSA.

The form is manual. The types of MS being performed are currently at the Land (Office or Field) and Commodity Bin. Using the FSA-409 to make a request, the producer provides FSA: the farm serial number, program year, farm location, contact person, and type of service request (acreage or production). The MS procedure is done in accordance with 7 CFR part 718. FSA is using the collected information to fulfill producers' measurement request and to ensure that measurements are accurate.

A producer will use the FSA-409 to request and receive certain MS information from FSA and provide it to FSA at the time of applying for certain program benefits. The MS information includes, but is not limited to, measuring land and crop areas, quantities of farm-stored commodities, and appraising the yields of crops in the field.

The formula used to calculate the total burden hours is “the estimated average time per response (including travel time)” times “the total estimated annual response.”

Estimate of Annual Burden: Public reporting burden for the collection of information is estimated to average 15 minutes per response. The travel time, which is included in the total annual burden, is estimated to be 1 hour per respondent.

Respondents: Producers.

Estimated Number of Respondents: 135,000.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual of Responses: 135,000.

Estimated Average Time per Response: 1.25 hours.

Estimated Total Annual Burden Hours: 168,750 hours.

We are requesting comments on all aspects of this information collection to help us:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the collection of information including the validity of the methodology and assumptions used;

(3) Evaluate the quality, utility, and clarity of the information technology; and

(4) Minimize the burden of the information collection on those who respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses where provided, will be made a matter of public record. Comments will be summarized and included in the request for OMB approval of the information collection.

Val Dolcini,
Administrator,
Farm Service Agency.
